

What it is

Trip histories are chronological summaries of each trip you've taken with Raven.

Accessing Trip Histories from the web app.

How it works

When you start your engine, your trip begins. An hour after you've turned your engine off, your trip ends. Raven waits an hour to end a trip, so stopping for gas or coffee doesn't result in a new trip.

Information on every trip you've taken with Raven is stored in Trip Cards, which you can access on the mobile app or similar information in the Histories tab of the webapp. Information includes maps, events, driving statistics, preview images and videos.

How to use it

From the web app:

1. From the dashboard select the 'Histories' tab in the navigation bar.
2. Select the vehicle of interest through the dropdown in the left hand corner.
3. Filter through the calendar and select a day.
4. Beside the calendar select from the list of trips or a duration while the vehicle was parked.
5. In the details panel all of the trip details will appear here and the route will appear on the map.

From the mobile app:

1. Select the History in the bottom navigation
2. Scroll through the map on the top of the screen to the month and day.
3. In the lower half of the screen scroll through the trips and select the one you'd like to review.

Access Trip History with a step-by-step [video](#).
